Report of seminar

Academic Year: 2018-2019

Activity: Seminar on the "PLC & SCADA".

Participant Count: 13 Students and faculty members.

Date of Activity: 14/11/2018 and 15/11/2018

Place: D.G.O.I. Seminar Hall.

Objectives: To know the basic concepts of PLC & SCADA. To make aware about the SCADA Software and different tools with its project.

Mr. Shinde A.A. has given the detailed information about the all parts of PLC & SCADA details. PLCs are designed to control complex industrial processes, such as running machines and motors. They are simple to program and fully scalable to an operation's requirements. They're also used to collect data from the systems they control. SCADA is a central system used to monitor and run plant processes. It's typically software installed on a computer, and one of its major functions is to act as an interface with industrial machines (or Human-Machine Interface, or HMI). In other words, it allows users to track information coming in from equipment, enter commands, make changes to their programming, etc.

Report of Workshop

Academic Year: 2021-2022

Activity: WORKSHOP ON "DEVELOPMENT OF ELECTRIC & HYBRID VEHICLE.

Participant Count: Day 1-110 Students and faculty members.

Day 2- 35 Students and faculty members

Date of Activity: 27/01/2022 & 28/01/2022

Place: Online Google meet

Objectives: To know the ELECTRIC & HYBRID VEHICLE.

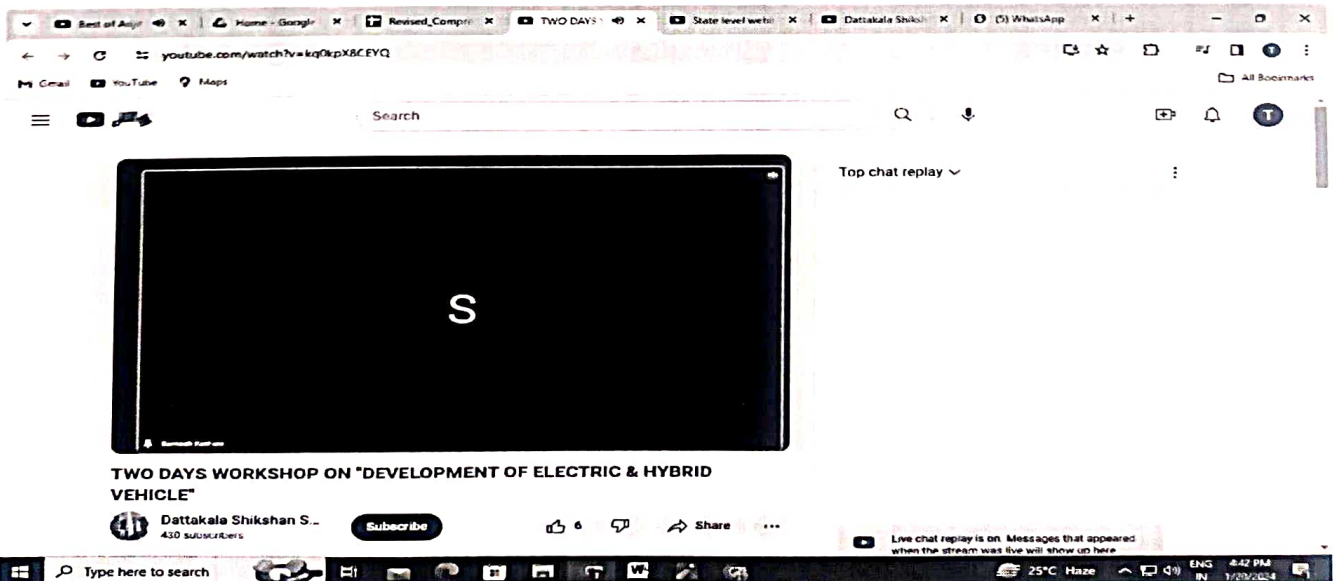

Speaker: Ravikant Nanwatkar

Assistant Professor at STES's

Ambegaon, Pune, Maharashtra, India

Hybrid electric vehicles are powered by an internal combustion engine and one or more electric motors, which uses energy stored in batteries. A hybrid electric vehicle cannot be plugged in to charge the battery. Instead, the battery is charged through regenerative braking and by the internal combustion engine. The extra power provided by the electric motor can potentially allow for a smaller engine. The battery can also power auxiliary loads and reduce engine idling when stopped. Together, these features result in better fuel economy without sacrificing performance.

COMPONENTS OF HYBRID POWER TRAIN
Hybrid Vehicle Powertrain Systems combine conventional powertrain components, an internal combustion engine and transmission, with new electric components, electric motor, power electronics and high voltage energy storage, such as a battery. Other hybrids include different energy storage systems at post-Kapoor plot.

TYPES OF ELECTRIC VEHICLE SYSTEM

- ▶ Electric Vehicle
- ▶ Plug in Hybrid
- ▶ Hybrid EV
- ▶ Hydrogen Fuel cell
- ▶ Gasoline Vehicle

DETAILS OF VEHICLE SYSTEM

- ▶ The Lubrication - including lubrication and cooling
- ▶ The Fuel System - including evaporative emission
- ▶ The Ignition System
- ▶ The Electrical System - including starting and charging
- ▶ The Exhaust System - including emission control
- ▶ The Drive Train - including the transmission
- ▶ The Suspension and Steering Systems
- ▶ The Brake System
- ▶ The Frame and Body

The method of writing a technical paper can be complicated if you don't have a specific structure and plan in place. We will guide you through the fundamental elements and tips to help you write an effective research paper in this step-by-step guide. Whether you are a skilled writer or just starting, having a well-defined structure is key to maintaining clarity and coherence in your technical or research paper.

IPR management in academic institutions is a complex process, in which the mandate of an institution includes education and research on the one hand and entrepreneurial results on the other. IP Management guidelines can be defined by various actors, including governments that seek to streamline national research outputs through provisions in higher education laws or legal instruments for funding research activities based on data about contributions to social well-being.

Great technical writing is hard to find as the majority is either overly complicated, long-winded or just lacking good basic grammar. It can genuinely be really tough to find sources worth reading and this is a shame, because with a few simple tweaks, an average piece of technical writing can be turned into a great one.

Many people have different definitions for this term. It can range anywhere from someone who merely aspires to be an author, to someone making a full-time living as a traditionally-published author. Some might add that authors should be published, whether that be traditionally or self-published. That's not a bad definition to have, and it is not a huge barrier either. Self-publishing makes it easy to publish a book, so if you include publishing as part of your definition, it is still not very difficult.

Speaker: Dr. Nilesh Uke Principal, Trinity Academy of Engineering Pune. A PhD is the penultimate academic degree. With their research that looks into solving critical world issues, PhD graduates help everyone understand the world around them better; hence the important role of research tools that help them achieve this. A PhD requires candidates to collect and gather data for their dissertation so they can make an informed analysis of whether their hypothesis is supported, as well as deduce future probabilities and trends. This is often a time-consuming process – one has to search from the library and internet for literature, conducting experiments, writing and publishing papers, on top of the tedious task of formatting these sources.
